

How to repair transparent gif if display faulty?

Upload your gif to ezgif.com, and please follow the steps.

The screenshot shows the ezgif.com interface with several red arrows and numbers indicating the steps to repair a corrupted GIF file:

- 1**: Click on the **Optimize** tab in the top navigation bar.
- 2**: Click on the **Repair a GIF** sub-tab.
- 3**: Select a repair method from the dropdown menu. The text says "3 select one method, Gifsicle works here." The dropdown currently shows "Gifsicle unoptimize".
- 4**: Click the **Submit!** button. The text says "4. create a new gif below".
- 5**: Select the **effects** tool from the bottom toolbar. The text says "5. Next select effects, let's change the background to black." The output image shows a pixelated character with a black background.

The interface includes a top navigation bar with tabs: GIF Maker, Video to GIF, Resize, Rotate, Crop, Optimize, Effects, Split, Add text, WebP, APNG, AVIF, and JXL. Below this is a sub-navigation bar with: GIF optimizer, Repair a GIF, PNG optimizer, JPG optimizer, and WebP optimizer. The main area is titled "Repair corrupted GIF file" and contains a toolbar with icons for crop, resize, rotate, optimize, reverse, effects, speed, write, censor, overlay, cut, split, frames, and save. The output image is displayed below the "Submit!" button.

Add effects to animated gifs
